

BASIC COLLEGE MATHEMATICS FALL 2009 HIGHLIGHTS

IMPROVEMENTS

1. New instruct screens for all sections in Chapters 1-7.
 - Improved content and layout
 - Correspond to the 8th edition textbook
 - Updated instruction
 - Added examples
 - Multiple step examples contain side notes that explain each step
 - Updated definitions
 - Updated/Added illustrations
2. In sections 1.2-1.8, increased support for the entry of commas in answer boxes.
3. Additional questions have been added for the following topics:
 - Determine a factor of a product by using division given the other factor and product which are both in fraction form.
 - Change the mixed number to an improper fraction. Given fraction is simplified.
 - Change the mixed number to an improper fraction. Given fraction is not simplified.
 - Find the quotient in decimal form between a decimal number and a fraction.
 - Determine the variable in the given proportion.
4. Added a print button to instruct screen 5 in section 1.5 that allows the user to print a blank multiplication table.
5. Removed all references to GCF.

MULTIMEDIA

1. Audio has been updated for all sections in Chapters 1-7.
